## GOOSE AND ANIMAL REPELLENT

### ALL-NATURAL REPELLENT SPRAY

Armorex Repellent Spray utilizes one of the most ancient methods known to discourage nuisance animal infestations. Used to repel geese and other animals, Armorex is easy on the environment and effective for up to a month.

## THE ARMOREX ADVANTAGE

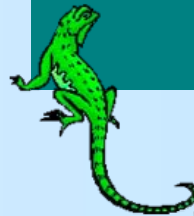

The mode of action of Armorex Repellent is a dual-deterrent system based on smell and taste. When animals approach the treated areas they are initially repelled by the odor of Armorex. If the animals persist and go into the treated area, one taste of any treated vegetation is usually sufficient to drive them away. Armorex contains hot pepper extract that causes mild irritation to animals and once they have been exposed to this situation, aversive conditioning assures that they do not re-enter the area, often for up to one month.

Armorex Repellent is 100% biodegradable and has a pleasant scent to people. The product is available as a liquid concentrate that is diluted with water for easy application.

### BENEFITS:

- COST COMPETITIVE WITH PESTICIDES.
- REPELS CRITTERS UP TO A MONTH.
- PESTS DO NOT BUILD-UP RESISTANCE TO ARMOREX.
- CAN BE USED ON SENSITIVE PLANTS AND TURE.

## GOOSE AND ANIMAL REPELLENT

### TECHNICAL DATA

**PURPOSE:** Armorex Repellent Spray is a foliar applied repellent spray which is absorbed and distributed throughout the plant. Armorex utilizes a dual-deterrent system to actively repel geese, and nuisance animals including deer, elk, rabbits, armadillos, and iguanas.

**COMPOSITION:** Concentrated garlic juice, white pepper, sesame oil and sodium lauryl sulfate (surfactant).

**APPLICATION METHOD:** Apply diluted product as a spray or fog to the foliage of turf, plants, shrubs, trees, brush, and lawn areas prior to times when nuisance animals are anticipated. Wet plants to the point of run-off. Small spray droplet size is most effective. Apply as a preventative treatment and then repeat on an "as needed" schedule to maintain repellancy. (Every 30 days approx.) For best results, do not apply within 12 hours prior to rainfall or irrigation. Avoid spraying with excessively hard water, spray oils, or paraffin based spreader/stickers.

**APPLICATION RATE:** Mix one part Armorex with 50-100 parts of water. Shake or stir product prior to mixing.

#### **PRECAUTIONS:**

##### **PRIOR TO TREATMENTS:**

Avoid breathing spray mist.

May cause severe irritation of nose, throat, and/or skin. Wear protective eyewear and gloves when handling this product. It is imperative to have an assistant and proper protective equipment in case of accidents. Check for leaks before beginning operation. Always handle Armorex in the open where there is good ventilation. In case of rupture of hose or fitting while applying Armorex, immediately stop application. Approach from upwind to make repairs. Keep people and pets out of treated area until spray has dried.

**STORAGE:** Store only in original container in a cool, dry place inaccessible to children and pets.

**DISPOSAL:** Rinse container thoroughly. Offer for recycling.

#### **DISTRIBUTED BY:**
