

*From a Satisfied Nemastop User--*

We have over 400 large boxwoods on our property that were having serious problems. We had them tested and found that they were being damaged by pathogenic nematodes. I was very worried because the loss of our boxwoods would devastate our landscape. I found Nemastop online and decided to give it a try because I wasn't going to use the heavy chemicals that were recommended.

Nemastop worked wonderfully! I'm very pleased with the product. This year I've made five treatments of Nemastop and we've had no die-back at all on the boxwoods. I've recommended it to several arborists and research people. Nemastop is pretty amazing stuff. I'm very impressed with it.
