

B.O.M.B.

Breakdown of Organic Matter with Biology

TECHNICAL DATA

PURPOSE: B.O.M.B. is a pioneering product designed to reduce thatch in turfgrass and reduce the need for mechanical dethatching.

COMPOSITION: B.O.M.B. liquid consists of naturally occurring bacteria strains known to produce enzymes such as lipase, protease, amylase, and cellulase.

TURF APPLICATIONS: Use one gallon of B.O.M.B. per acre, mixed in water or liquid fertilizer. Applications should be made when soil temperatures are between 55-90°F. Apply as needed.

B.O.M.B. can be watered in by regular irrigation or rainfall.

APPLICATION METHOD: Apply B.O.M.B. liquid with water or liquid fertilizer (min. 40 gallons/acre). The product should be watered in by irrigation or rain after application. Allow 2-3 days between B.O.M.B. applications and the use of herbicides, fungicides and insecticides. Core aeration or spiking prior to application of B.O.M.B. is helpful to ensure better contact with organic matter.

B.O.M.B. is trademark of Soil Technologies Corporation, copyright 2024
