

Why TurfTech Bio-Products?

University Research:

Only products researched by independent third parties give you 100% confidence.

"On the international front, The South Japan Green Institute published reports in which TurfTech Bio reduced soil compaction by 12-15%, improved water-infiltration by 44-52%, increased root growth by 22-41%, and increased soil nitrogen content by 33%."

-Golf Course Trades, March 2009

Experienced:

TurfTech products have been used by golf course superintendents since 1986, in the U.S.A., Canada, Europe, and Japan.

"Soil Technologies Corp., located in Fairfield, IA, has led the industry development of bio-fertilizers and bio-pesticides since 1986. The company's products have been used on over 1,000 golf courses throught out the U.S."

-Mountain West Turf, May 2005

Cost Savings:

Our products have been shown again and again to cut fertilizer and chemical costs when used in a program.

"Having a biologically active soil is like having a mini fertilizer manufacturing plant producing small amounts of 10-5-2 on a continuing basis. This system is worth perpetuating." Elliot C. Roberts of The Lawn Institute. "The Biology of Soils", Golf Course Management, April, 1989.

Representatives:

Our experienced reps can provide you with a broad range of knowledge, to assure your complete success.
